

# **(\$WRP) A new utility token to improve market efficiency in the games industry.**

## **1. General Information**

### **1.1 Crypto-Asset Name and Identifier**

- Name: Warp Token
- Ticker: \$WRP
- Token Standard: ERC-20
- Network: Avalanche C-Chain
- Smart Contract Address: 0xeF282B38D1ceAB52134CA2cc653a569435744687

### **1.2 Issuer Information**

- Issuer: Nitro Technology Limited
- Jurisdiction of Incorporation: Marshall Islands
- Registered Address: Trust Company Complex, Ajeltake Road, Ajeltake Island, Majuro, MH96960

### **1.3 Whitepaper Purpose**

This document is published to satisfy the disclosure requirements of Article 5 of Regulation (EU) 2023/1114 (MiCA). It describes the characteristics, functionality, and risks of the Warp Token (\$WRP). This document does not constitute an offer of securities, financial instruments, or investment advice.

## **2. Description of the Project**

### **2.1 Project Overview**

Warp is a decentralized game publishing layer 1 chain utilizing the Avalanche network with a consumer facing platform operating under the Warp Nation brand (<https://warpnation.com>). The platform enables game studios, communities, and service providers to transact, distribute digital goods, and settle publishing-related services on-chain.

The Warp ecosystem is designed to reduce reliance on traditional intermediaries and fiat payment rails by providing a neutral, blockchain-based settlement layer for global game publishing activities.

### **2.2 Platform Components**

- Warp Nation Platform (transactions, marketplace, launchpad, store, community)
- Warp Publishing services (game publishing and user acquisition)
- Validator infrastructure operated by:
  - Independent participants
  - Game studios published by Warp
  - Game communities providing services to game studios above

## 3. Description of the Crypto-Asset

### 3.1 Nature of the Token

\$WRP is a utility crypto-asset designed to function as a medium of exchange and validation incentive within the Warp ecosystem. It does not represent equity, debt, ownership rights, governance rights, or entitlement to profits.

The token is not backed by any asset and is not redeemable for fiat or other crypto-assets.

### 3.2 Token Creation and Availability

\$WRP is exclusively obtained through:

- Protocol emissions as a result of network validation
- Secondary market purchases on centralized or decentralized exchanges

The token is not distributed through gameplay, airdrops, or entertainment products.

## 4. Rights and Obligations Attached to the Token

### 4.1 Rights

Holding \$WRP allows the holder to:

- Use the token to pay for goods and services on the Warp Nation platform
- Stake tokens to validator nodes to participate in network validation

### 4.2 Absence of Additional Rights

Holding \$WRP does not provide:

- Voting or governance rights
- Rights to dividends, interest, or revenue share
- Rights to repayment or redemption

## 5. Utility and Functionalities

\$WRP is used exclusively within the Warp ecosystem for the following purposes:

- Payment for publishing, user acquisition, and development services
- Settlement of transactions for digital goods, including game-related digital assets
- Listing and participation fees for the launchpad and marketplace
- Participation in platform, guild, and partner events
- Network validation via WNode staking

The token enables on-chain settlement without requiring users to interact with local fiat currencies or financial institutions.

## 6. Network Operation and Consensus

### 6.1 Validator Nodes (WNodes)

The Warp network relies on validator nodes (“WNodes”) operated by independent third parties, and network participants including partner game studios, partner communities, and independent participants.

### 6.2 Staking Mechanism

Node Licence owners may stake \$WRP to validator nodes. Staked tokens support network security and decentralization. Validators receive \$WRP as protocol emissions once satisfying the stake weight of the node being validated for participation in consensus.

No rewards are generated from passive holding without staking onto a live node.

## 7. Token Supply, Allocation, and Vesting

### 7.1 Allocation Principles

Token supply is allocated to support:

- Network validation rewards
- Community and ecosystem growth
- Platform development and long-term sustainability
- Liquidity provisioning

### 7.2 Vesting and Lockups

- No insider token unlocks occur at the Token Generation Event (TGE)
- Team and foundation allocations are subject to long-term cliffs and linear vesting
- Validator and community rewards are distributed progressively based on activity

### 7.3 Full Allocation and Tokenomics

- [Link to complete tokenomics](#)

## 8. Use of Proceeds

The issuer does not rely on token sales as a source of operating revenue. Project operations are funded through fiat income derived from game publishing revenue.

No commitments are made regarding token buybacks, burns, or price support mechanisms.

## 9. Governance Arrangements

\$WRP does not confer governance rights. Token holders cannot propose, vote on, or enforce protocol changes.

Decisions relating to protocol upgrades and platform development are managed by the project team.

## 10. Risks

Key risks associated with \$WRP include:

- Technological risks related to smart contracts and blockchain infrastructure
- Market risks, including liquidity and price volatility
- Regulatory risks arising from changes in applicable laws
- Operational risks related to platform adoption and third-party participation

Holding or using \$WRP may result in partial or total loss of value.

## 11. Transparency and Technical Information

- Smart contract source code: [https://github.com/nitrodome/warp\\_token](https://github.com/nitrodome/warp_token)
- Avalanche infrastructure documentation: <https://github.com/ava-labs/avalanchego>

Transactions are publicly verifiable on-chain. The protocol does not collect or store personally identifiable information.

## 12. Legal Notice

This whitepaper is provided for informational purposes only and is intended to comply with MiCA disclosure requirements. It does not constitute a prospectus, investment recommendation, or solicitation to purchase crypto-assets in any jurisdiction where such activity is restricted.

**Article 4(3) Attestation:** The issuer confirms that, to the best of its knowledge and belief, the information contained in this whitepaper is fair, clear, and not misleading, and that no material information has been omitted that would be necessary to ensure such clarity.
